## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 19-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Restarick et al.

Figure 7B shows a tubular having a first conduit 126a attached thereto. Sensor line 136a which is a fiber optic line is placed within the conduit. As to claim 20, the fiber optic line could be used to sense temperature. As to claim 20, a second conduit (unnumbered) is also attached to the tubing and the lines 136a and 136c extend through these two aligned conduits.
